8/10/12	Palliative Care
	<p>Met Dawn (daughter) + Michael (nephew) via telephone to discuss plan of care. Discussed plan in detail. Family does understand that improvement is very unlikely. Discussed withdrawal of life support in detail, which is likely. Dawn will let us know when a decision is made. She does not want dialysis to be given today.</p> <p style="text-align: right;">Nancy Jean APN</p>
9/10/12 2:10pm	<p>Nutrition Note</p> <p>Pt remains at high nutrition risk. TF regimen currently on hold 2nd multiple pressor administration to pt. Pt is partially NPO. Foot wound, Stage II surgical ulcer, bacterial, 10 foot full thickness wound.</p> <p>9/10 labs. Alb 19, Cu 76, PCr 4.8 ²⁶ #45.0 ⁸⁵</p> <p>Will continue to monitor for possible diet ^{4.5} ^{3.50} adjustment.</p> <p style="text-align: right;">(Monica A. Salvo, RD)</p>
